Ashdown Consulting Ltd

MTD -ARE YOU READY?

Many companies and organisations are now ready to face the challenge of MTD, or Making Tax Digital—but are you ready?

It has come to our attention that, for a whole host of different reasons, many companies cannot upgrade their systems at this time because it is not affordable, not convenient or not desirable.

Here at ACL we have created a bridging solution for Sage systems which requires no rekeying, no copying and pasting and makes the whole MTD situation very simple. If you don't use Sage, still get in touch we will probably be able to help.

Don't take our word for it, read our case studies below and get yourselves ready!!

WHITBY SEAFOODS

Whitby Seafoods are mid-way through a new ERP implementation, but are as yet unable to migrate the accounting records to the new system. We are however required to file VAT returns using MTD, functionality that the version of SAGE 200 we run does not have. We were reluctant to upgrade SAGE 200 due to cost, time and return on investment considerations. We therefore looked at a number of "bridging" solutions to allow us to use the soft landing option offered by HMRC. This would give us the time to complete the implementation of the new ERP and adapt our existing SAGE platform to meet the MTD requirement.

ACL were able to provide an efficient, simple to use and cost effective tool to allow us to take our existing non MTD compliant SAGE installation, and file MTD. It was almost as easy as if it was embedded functionality. All through the process ACL were eager to assist in making sure the process worked and we were meeting our reporting requirement.

Mark Teasdale, Financial Controller

GAMOLA GOLF

Nick at ACL-solutions was able to solve a problem we were having in moving to the new VAT Making Tax Digital requirements by allowing us to connect to our existing Sage database (which is an older version and doesn't support MTD) and generating and submitting the necessary data to HMRC.

The solution is simple to use, quick, accurate and very cost effective for us as we don't need to upgrade our main sage system at this time. A great solution all round and am over the moon that Nick was able to suggest this.

Graeme Masterton, Director
